If any difficulty is encountered in applying this guidance or if any other contributing factor indicates a need for changes in this guidance, the contractor is authorized and encouraged to provide recommended changes; to challenge the guidance or the classification assigned to any information or material furnished or generated under this contract; and to submit any questions for interpretation of this guidance to the official identified below. Pending final decision, the information involved shall be handled and protected at the highest level of classification assigned or recommended. (Fill in as appropriate for the classified effort. Attach, or forward under separate correspondence, any documents/guides/extracts referenced herein. Add additional pages as needed to provide complete guidance.)                                                                              |                                   |         |                         |                        |                         |  |  |  |  |  |  |  |
| 10a. The requirements and procedures for the protection of COMSEC information are set forth in the National Industrial Security Program Operating Manual (NISPOM) [current edition: DoD 5220.22-M dated February 28, 2006]. The COMSEC requirements of the NISPOM are imposed on the contractor for safeguarding the COMSEC information. Contractor is authorized to receive Government furnished cryptographic equipment. Access to any classified COMSEC information requires a final U.S. Government clearance at the appropriate level. Non-accountable COMSEC information, though not tracked in the COMSEC material control system, may still require a level or control within a document control system; refer to NSA/CSS Manual 3-16, Control of Communications Security Material, page E-4 for guidance. Methods of destruction of classified COMSEC information by a contractor, to include subcontracting, requires prior approval of the government contracting activity.
