2022-2023 Catalog

EXECUTIVE PRICING SUMMARY

DRS Training & Control Systems, Inc. (DRS TCS) is pleased to provide the 2022 Catalog for our Advanced Data Acquisition and Control System (ADACS) and Arc Fault Detection (AFD) system equipment. To better serve our customers, we have incorporated standard lead times for each part number type to assist with forward scheduling and funding allocation. To aid in the schedule planning for large orders, the lead-time information has been expanded to provide customers the initial lead-time (and quantity that can be committed) along with the quantity that can be fulfilled over time. The catalog includes expanded range pricing providing more flexibility to accommodate quantity variance requirements while affording the customer an economy of scale benefit closer to the actual demand or need.

DRS TCS sincerely appreciates the platform Original Equipment Manufacturers (OEM), Primes, and commercial companies and agencies who selected our ADACS and AFD system to protect against catastrophic arcing events. The DRS TCS team is committed to promoting new opportunities through high performance execution and unwavering commitment to our customers.

To expedite your request we encourage you to email specific request for quotes to RFQ@drs.com and the award of orders/contract to TCS.ContractAwards@drs.com.

Please feel free to contact our team with any questions, concerns, or suggestions on how we can better serve your needs: Amberly Kies, DRS TCS (Program Manager, ADACS Product Line): Amberly.Kies@drs.com.

II. FREQUENTLY ASKED QUESTIONS

a. Where can I find additional information about the ADACS parts?

Additional information including EMI, dimensions, Power Rating, Temperature operation and storage, and weight are available to all prospective customers via ADACS specifications sheets, which are available in the online documents sections at <https://www.leonardodrs.com/what-we-do/products-and-services/advanced-data-acquisition-and-control-system-adacs/>

b. Does DRS provide cost and pricing data or invoice information?

No. The ADACS product line is a commercial product per the definition in FAR 2.101 and DFARS 212.101 and is governed primarily by FAR part 12, which addresses fair and reasonable pricing under FAR 12.209 and identifies commercial products as being exempt from requiring cost and pricing, to include providing invoices. ADACS parts are offered for sale to the public, including the US Government, through the online catalog at <https://www.leonardodrs.com/what-we-do/products-and-services/advanced-data-acquisition-and-control-system-adacs/>.

c. What is the difference between USIM Software Version 6.0 and 4.0?

Software version 6.0 replaces version 4. This change eliminates sending a false wideband photo sensor channel 1 alarm Continuous Thermal Monitoring (CTM) message when ADACS Thermal Ionization Detector (TID) is connected to USIM channel 8 and the TID is activated on an overheated connection. Additionally, this change, reduces false alarms by adding 4 seconds to the TID BIT Active time within the USIM. Version 5.0 was engineering only and was never released to production.

d. Do ADACS Control Units need to be ruggedized?

ADACS Control Units are already “ruggedized” meaning that these units meet the environmental and EMI requirements for service aboard US Navy vessels. This is included in the catalog price.

e. How do I calculate the Due Date?

Customers should include a due date that reflects the catalog lead time, as well as the initial/follow-on quantity and frequency noted in tables. Please note, DRS shall deliver the initial quantity of units after the referenced lead time. If applicable, a follow-on quantity will be provided at a rate noted by the frequency. Dates can be noted in two ways a) as separate line items or b) as the latest date with early shipment authorization included.

*Example: Quantity 5 of part number, 07030000-6
(Lead time=392 days, Initial Qty=2, Follow-on Qty=1, Frequency=Weekly).*

Using this example, DRS can deliver the initial two (2) units after 392 days, with a follow-on delivery of (1) unit per week. Therefore, the lead time to deliver a total quantity of 5 units is 413 (392 days + 21 days).
