SEE FIRST, UNDERSTAND FIRST, ACT FIRST AND FINISH DECISIVELY WITH ESA

ENHANCED SITUATIONAL AWARENESS
Leonardo DRS’ ESA system improves survivability and mission capability by providing users with enhanced coverage. DRS’ Driver’s Vision Enhancer (DVE) Wide camera module is at the heart of the ESA system. Featuring three 17-micron uncooled infrared cameras, it outputs a stitched 107° x 30° field of view video where each of the three internal and up to three external camera videos can be individually selected by the user.

The driver can electronically pan through the 107° total horizontal field of view the new camera provides. This unique capability allows the driver to see the road edges on both sides. The incorporated vehicle wheel track indicators aid the driver in clearly identifying any potential impediments to safe operation, whether driving forward or in reverse.

Currently fielded DVE systems can be easily upgraded to an ESA system, with its simple, drop-in replacement design. Any vehicle currently equipped with a DVE system can be readily upgraded to a DVE Wide in the field, without altering the system’s current configuration. By using the existing Display Control Module (DCM), the user can avoid costly and time-consuming DCM upgrades and installation. DRS’ ESA system increases survivability, mobility, force protection, and safety to turn situational awareness into situational advantage.

OPTICS

- **Field Of View (FOV)**  
  - DVE ULTRALITE: 40° x 30°  
  - DVE WIDE: 3X 40° x 30° FOVs, electronically stitched to provide seamless 107° x 30° video  
  - DVE ULTRAWIDE: 114° x 98°

PHYSICAL

- **Weight**  
  - DVE ULTRALITE: < 1.25 lbs.  
  - DVE WIDE: < 7.5 lbs.  
  - DVE ULTRAWIDE: < 3 lbs.

- **Size**  
  - DVE ULTRALITE: 4.8 x 2.8 x 2.8 inches  
  - DVE WIDE: 8.8 x 5.7 x 3.7 inches  
  - DVE ULTRAWIDE: 6.3 x 4.8 x 4.5 inches

POWER

- **Power Consumption**  
  - DVE ULTRALITE: < 5.0 W  
  - DVE WIDE: < 14.0 W  
  - DVE ULTRAWIDE: < 5.0 W

VIDEO

- **Communication Interface**  
  - DVE ULTRALITE: RS-232 / USB 2.0  
  - DVE WIDE: RS-232 / USB 2.0  
  - DVE ULTRAWIDE: RS-232 / USB 2.0

- **Video Interface**  
  - DVE ULTRALITE: RS-170  
  - DVE WIDE: RS-170, RGB, DVI  
  - DVE ULTRAWIDE: RS-170

ENVIRONMENTAL

- **Operating Temp**  
  - DVE ULTRALITE: -37.0° C to 49.0° C plus solar load  
  - DVE WIDE: -37.0° C to 49.0° C plus solar load  
  - DVE ULTRAWIDE: -37.0° C to 49.0° C plus solar load

Wide display mode provides the user with the ability to pan 107° of the scene in the front of the vehicle. The pan position indicator on the bottom half indicates what portion of the scene is displayed on the upper part of the display. Pan40 display mode provides the user with the ability to pan the entire 107° scaled to the full display size.

Rear display mode provides the user with the ability to view what is behind the vehicle. The image in the bottom of the display shows the scene in front of the vehicle. External cameras on (EXT-ON) and external cameras off (EXT-OFF) mode provides the user with the ability to turn on and off the left side, right side and rear camera in Wide, Pan40, and Rear display mode.
